**AN ORDINANCE BY COMMUNITY DEVELOPMENT/HUMAN RESOURCES COMMITTEE
ADOPTING THE CITY OF ATLANTA 2014-2018 CAPITAL IMPROVEMENTS PROGRAM (CIP)-
SHORT TERM WORK PROGRAM (STWP) COMPONENTS OF THE COMPREHENSIVE
DEVELOPMENT PLAN (CDP); AND FOR OTHER PURPOSES.**

WHEREAS, key components of the Comprehensive Development Plan (CDP) are the five year Capital Improvements Program (CIP) and Short Term Work Program (STWP), a single planning document entitled 2014-2018 CIP-STWP; and

WHEREAS, these annual plan updates provide guidance and direction to the City's capital project programming and budgeting process by identifying needed improvements to the capital facilities of the City as well as major actions to be undertaken by the City to implement the CDP which include a description of community and economic development initiatives or programs, major capital improvements or infrastructure expansions, regulatory measures or land development regulations over the next fifteen years; and

WHEREAS, the 2014-2018 CIP-STWP has been prepared in accordance with the Development Impact Fee Compliance Requirements and the Minimum Planning Standards and Procedures for Local Comprehensive Planning established by the Georgia Planning Act of 1989; and

WHEREAS, in order to maintain Qualified Local Government (QLG) status under the Georgia Planning Act of 1989, the City must have an approved and adopted 2014-2018 CIP-STWP; and

WHEREAS, both the Atlanta Regional Commission (ARC) and the Georgia Department of Community Affairs (DCA) will have completed their respective sixty-day review and comment of the 2014-2018 CIP-STWP prior to adoption; and

WHEREAS, a public hearing for the City of Atlanta's 2014-2018 CIP-STWP occurred on March 11, 2013; and

WHEREAS, recommendations of the 2014-2018 CIP-STWP for projects to be funded from sources anticipated, projected, or recommended have been updated to reflect current needs.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF ATLANTA, GEORGIA, HEREBY RESOLVES:

SECTION 1: That the 2014-2018 CIP-STWP planning document, attached hereto as Exhibit "A" and incorporated herein by reference, is hereby adopted to provide guidance to capital programming and budgeting decisions.

SECTION 2: That the specific funding recommendations of the 2014-2018 CIP-STWP for projects to be funded from sources anticipated, projected, or recommended beyond 2014 are tentative and subject to further refinement in the 2011 CDP and CIP-STWP processes.

SECTION 3: That all ordinances and parts of ordinances in conflict herewith are hereby repealed to the extent of the conflict.

Introduction

Capital Improvements Program (CIP) Introduction

The City of Atlanta's Capital Improvements Program (CIP), updated annually, is an implementation plan for the construction, maintenance, and renovation of public facilities and infrastructure. The CIP shows the allocation of projected expenditures for capital projects expected over the next five years.

The CIP includes those items typically considered as “*infrastructure*”—streets, sewer lines, bridges, etc., as well as facilities through which City government provides services directly to citizens or in support of City operations. The latter category includes such facilities as police precincts, recreation amenities, maintenance facilities, and general office buildings. The CIP covers all facilities that City government owns and has responsibility for. It includes facilities of both general government operations and enterprise operations. The Water and Sewer System and Hartsfield-Jackson Atlanta International Airport are enterprise operations. The enterprise operations are self-supporting and generate their own capital funds through revenue bonding or operating revenues, while general government capital improvements rely on annual bond issues and voter approved general obligation bonds, as well as general and internal service funds, and dedicated tax millage and grants.

The CIP is based on the City's Comprehensive Development Plan (CDP). The CDP is intended to provide policy direction for the capital funds budgeted in the annual budget and implementation of the Georgia Development Impact Fee Act, the annual General Obligation Bond issue and other capital fund sources. The CDP programs and projects are separate from the CIP and are identified as the Short Term Work Program (STWP).

The CIP document is submitted with the STWP to the Atlanta Regional Commission (ARC) and to the Georgia Department of Community Affairs (DCA), as required by the Georgia Planning Act, in order for the City of Atlanta to maintain its Qualified Local Government (QLG) status. The CIP/STWP has to be adopted every year by October 31st. QLG status makes the City of Atlanta eligible for various state and regional funding and to collect impact fees.

Capital Improvements - Definitions

The CIP identifies major improvements and capital purchases needed to improve services to the community. Projects covered in this Program involve City infrastructure and facilities, which have the following characteristics:

- any project, facility or equipment with a monetary value of at least *\$25,000 and will last longer than 5 years.*
- any project, facility or equipment, which meets the above criterion and will benefit from extended life through renovation, replacement, refurbishment or expansion.
- any project, facility or equipment that is currently funded in an existing capital improvement or bond program that will not be completed by June 30, 2014.
- any project that results in purchase, improvement or development of land.

Introduction

Normal equipment items, such as rolling stock, are not part of the CIP process and are treated as operating budget items.

As noted, the City CIP covers City government capital projects only. These projects are carried out to provide the facilities for the provision of City services, to supply the basic infrastructure of streets, bridges, sewers, sidewalks, etc. and to support, encourage and shape the direction of private development. Many other factors influence infrastructure development in the City, such as the Metropolitan Atlanta Rapid Transit Authority (MARTA), the Atlanta Housing Authority, the BeltLine, the State and Federal Governments, Community Improvement Districts and the Atlanta Board of Education. Also, private developments directly interact with the future and direction of City growth, requiring City involvement and support and providing the opportunity to leverage focused private investment with City resources.

CIP/STWP Plan Development and Approval

The CIP Subcabinet, a committee comprised of representatives from each City Department, was responsible for developing project listings based on identified and projected needs. Each department is responsible for completing the information for each project listed in the CIP and for ensuring projects included in the document could be linked to identified funding sources.

The 2014-2018 Capital Improvements Program was developed by the CIP Subcabinet. After an initial public hearing on March 11, 2013 and approval of the transmittal resolution from City Council on June 17, 2013, the CIP/STWP was sent to ARC and DCA for a 60 day review. Afterwards, the CIP/STWP will be before City Council for adoption.

The management and implementation of projects in each specific chapter are the Department's responsibility. The Office of Planning in the Department of Planning and Community Development is responsible for preparing the CIP document and for reviewing the CIP for conformity with adopted development policy and plans for the City. The Department of Finance is responsible for making recommendations as to funding sources and schedules.

Funding Sources for the Capital Improvements Program

The CIP identifies revenues that are forecasted to be available for capital purposes. The appropriation of these funds is accomplished through the City's normal budget process. Operating funds, including the Park and Improvement fund and the renewal and extension funds are subject to the regular City budget cycle and are appropriated as part of the annual budget. Other funds, such as grants and bond proceeds, are appropriated whenever they are received or awarded during the course of the fiscal year. Items programmed in the CIP to be funded from expected revenues are still subject to appropriation in the normal budget process.

The voters through bond referendum are responsible for approving any additional General Obligation Bonds beyond the statutory limits. On July 19, 1994, voters approved \$149,970,000 to finance the cost of various capital projects for the City, consisting of \$78,225,000 for streets, bridges, viaducts and related public improvements; \$55,605,000 for improvement of storm water

Introduction

drainage facilities and related public improvements; and \$16,140,000 for erosion and flood control and related public improvements.

On November 7, 2000, voters approved \$150,000,000 to finance the cost of various capital projects for the City in the 2000 Quality of Life Improvement Bonds. This bond funded projects in four broad categories: Sidewalk Program; Public Plazas and Greenspaces; Public Streets, Bridges & Viaducts; and Public Traffic Control Devices.

The Capital Improvements Program Document

The CIP includes a total of 122 projects with a preliminary estimated cost of approximately \$1.6 billion dollars. The table below summarizes the funded capital projects included in the 2014-2018 CIP/SWTP.

Introduction

The Capital Improvements Program document has been designed to be informative and user friendly for all of the stakeholders interested in the City's capital projects. The data for each project included in the CIP is pulled from a relational database that the members of the CIP Sub-Cabinet committee (departments and agencies involved in the CIP process) have access to for data entry.

The CIP is divided into departmental chapters. The chapter for each department includes the Department mission statement, followed by a table that summarizes all of the capital projects for that department. This summary includes the project's capital improvement identification, project name, estimated cost, Council District and current project status. Following the summary, each capital project is listed individually. The project name and number, estimated cost, funding source, description, project type, project phase, start and end date, Council District(s) and Neighborhood Planning Unit(s) (NPU), and a general location map is included.

The project phase identified in each capital project is the current phase of the project. This is also identified in the summary table for each department as the project status. The following phases can be attributed to an individual project:

- **Planning:** The process of the design phase based on the needs and requirements collected in the conceptual phase. This includes scheduling, developing solutions to needs and requirements, setting up the functional specifications and cost estimates.
- **Concept:** Pre-design phase that explores design ideas which are plausible and sets up situational constraints in order to generate new options.
- **Design:** An implementation on the foundational analysis, solutions and specifications developed in the initial stages.
- **Environmental Clearance:** The National Environmental Policy Act (NEPA) of 1969 established protocol by which agencies are required to evaluate projects impacts on the social and natural environment. There are three levels of Environmental Clearance: Categorical Exclusion, Environmental Assessment (EA), and Environmental Impact Statement (EIS).
- **Property Acquisition:** The process of acquiring properties or land necessary to build a project.
- **Utility Coordination:** Effectively identify utilities and resolve conflicts on proposed plans.
- **Final Design:** The detailed architectural and engineering drawings of all physical components of the project are produced.
- **Bid and Award:** The process of submitting a proposal with a cost estimate and a contractual agreement on the bid offer and proposal of both parties.
- **Construction:** The development of the project is in process.
- **Close Out:** The process when the project's construction is finished and is in a period of acceptance or rejection of the construction.
- **Completed:** The project has been executed and will be included in Appendix B: List of Completed Projects if the project was completed between January 1, 2011 – June 30, 2013.
- **Cancelled/Dropped:** A project can be cancelled or dropped due to an event that has occurred before the end of the project's expected life. These projects will not be included in the Capital Improvement Programs project list.

Introduction

The Connection between the Capital Improvements Program & The Comprehensive Development Plan

The Community Agenda portion of the Comprehensive Development Plan includes policies, programs and projects needed to implement the Comprehensive Plan over the next 15 years. That list of programs and projects is updated annually in the document known as the Short Term Work Program or the CDP Project List. The STWP is the second portion of this document. As funding for a capital project is identified, then that capital project is also listed in the Capital Improvement Program.

Impact Fee Capital Improvement Element (CIE)

The City of Atlanta Development Impact Fee Ordinance was adopted by the Atlanta City Council on March 18, 1993 in accordance with the Authority provided by Article 9, Section 2, paragraph 4 of the Constitution of the State of Georgia and the Georgia Development Impact Fee Act (DIFA) (Title 36, Chapter 71, Official Code of Georgia Annotated). The ordinance is currently being updated.

In order to collect impact fees, the City of Atlanta has to complete a Capital Improvement Element (CIE) every year. The CIE has two components: an Annual Financial Report and a Schedule of Improvements. The Annual Financial Report provides an overview of impact fees collected, encumbered and used by category of public facility and service area for the last completed fiscal year. The Schedule of Improvements identifies capital projects to be financed in whole or in part by impact fees during the upcoming five years. The Impact Fee Capital Improvement Element is in Appendix A.

List of Completed Projects

A list of capital projects completed over the last two years is in Appendix B. The list is organized by the Department. For each completed project, the project name, description, completion date, estimated cost, Council District and NPU is included.

Introduction

Public Art Program

Since its start in 1977, the City of Atlanta Public Art program has supported the creation of public art through the Percent-for-Art Ordinance. The ordinance requires that a percentage of major capital improvement projects' construction be set aside for public art. The ordinance identifies the funds (grant funds, general obligation bonds, revenue bonds, general funds) and the types of projects (new construction or remodeling, parking facilities, street and streetscape improvements) that participate in the 1.5% percent allocation for public art.

The Public Art Program is administered by the Office of Cultural Affairs Public Art Program Manager in the Department of Parks, Recreation and Cultural Affairs. The Public Art Master Plan is the guide for the development, administration and conservation of public art. The Public Art Advisory Committee advises on the implementation of the master plan.

The percent for the art should be identified as soon as the Capital Improvement Program budget is established. This ensures that planning for the public art is included in the project's development.

Revitalization of Harris Homes

Project Number: AHA--3661

Project Type:	Housing	Phase:	Construction
Project Start Date:	October 2009	Estimated	
Project End Date:	December 2017	Project Cost:	\$25,710,000.00
District(s):	4	Funded:	\$21,210,000.00
NPU(s):	T	Shortfall:	\$4,500,000.00

Description: AHA procured Harris Redevelopment LLC, which is a joint partnership between Integral Properties and Real Estate Strategies, to develop CollegeTown at West End on the site of the former Harris Homes as a dynamic mixed-use, mixed-income multi-generational community. The revitalization vision to create a quintessential college town environment is based on a strategic partnership with Morehouse College, Spelman College, Clark Atlanta University and Morehouse School of Medicine that integrates the newly developed community with the Atlanta University Center schools. Upon completion, the revitalized community will replace 760 functionally obsolete and severely distressed multifamily units with 290 elderly-only rental units, 26 special needs rental units, 373 multifamily rental units, 333 on-site for-sale homes and 50 off-site affordable for-sale homes in the surrounding community. To date, 689 rental units and 38 off-site affordable for-sale homes have been completed. The remaining on-site homeownership units, neighborhood-serving retail and a 100-room hotel will be developed as market conditions warrant. The revitalization of Harris Homes was made possible by \$39M in HOPE VI demolition and revitalization grant funds from the U.S. Department of Housing and Urban Development. These funds were leveraged by AHA and its private sector development partner to secure \$54M in private debt, Low Income Housing Tax Credit equity and other development funds. AHA provided an additional \$11M for site remediation and strategic acquisitions. Public Improvement costs to date are \$21.2M and work is complete on these phases which includes construction of public streets, streetscaping, storm/sewer separation (consistent with the consent decree), water distribution and erosion control improvements in the public right-of-way. The City of Atlanta funded \$17.7M consisting of \$7.5M in Housing Opportunity Bonds, \$7M in Quality of Life Bonds, and \$9.5M in Water and Sewer Bonds. All funds are expended. AHA provided \$3.5M to support the installation of public improvements. Future public improvement project costs include the \$4.5M proposed widening of Lowery Street which is planned in the next 48 months. This activity will support the overall revitalization plan by alleviating traffic congestion along Lowery Boulevard between I-20 and Fair Street. \$3.5M is requested from the City of Atlanta from the City of Atlanta existing State-funded transportation allocation. AHA will provide \$1.0M in match funds. The CIP funding shortfall for Harris Homes is \$4.5M. The Harris Homes HOPE VI revitalization program has served as a catalyst for community and economic development, generating approximately \$102 million in area investments, including APS investments in a new high performing elementary school, a state of the art Performing Arts Center, and a YMCA early childhood development center. When completed, the estimated total area economic impact of this revitalization initiative will be over \$278 million.

Revitalization of McDaniel Glenn

Project Number: AHA--3662

Project Type:	Housing	Phase:	Construction
Project Start Date:	June 2006	Estimated	
Project End Date:	December 2017	Project Cost:	\$22,300,000.00
District(s):	4	Funded:	\$15,600,000.00
NPU(s):	V	Shortfall:	\$6,700,000.00

Description: AHA procured McDaniel Glenn Revitalization LLC, which is a joint venture partnership between Columbia Residential, RHA and SUMMECH Community Development Corporation, to develop Mechanicsville on the site of the former McDaniel Glenn as a dynamic mixed-use, mixed-income multi-generational community. Promoting a healthy and sustainable community, the master plan includes the revitalization of recreational green space at Rosa Burney Park, and the redevelopment of the Dunbar Recreational Center in partnership with the City of Atlanta and the Annie E. Casey Foundation. Upon completion, the revitalized community will replace 588 functionally obsolete and severely distressed public housing units with mixed-income housing consisting of 155 elderly-only rental units, 658 multifamily rental units, 174 on site for-sale homes and 110 off-site for-sale homes in the surrounding community. To date, 813 rental units and 16 off-site for-sale homes have been completed, some in partnership with the City through its Neighborhood Stabilization Program. The remaining for-sale homes will be developed as market conditions warrant. The revitalization of McDaniel Glenn was made possible by \$20M in HOPE VI revitalization grant funds from the U.S. Department of Housing and Urban Development. These funds were leveraged by AHA and its private sector development partner to secure \$67M in private debt, Low Income Housing Tax Credit equity and other development funds. The overall Public Improvements budget is \$22.3M with \$14.5M expended to date on the construction of public streets, streetscaping, storm/sewer separation (consistent with the consent decree), water distribution and erosion control improvements in the public right-of-way. The City of Atlanta funded \$11.2M from Water and Sewer Bonds, of which \$10.1M has been expended. AHA provided \$4.4M to support the installation of public improvements. Future public improvement project costs include \$7.8M for the public improvements work associated with the development of the balance of the McDaniel Glenn footprint and the three scattered site annex parcels located within the Mechanicsville neighborhood. This work is planned in the next 48 months and will support the development of 174 for-sale homes. \$1.1M of the \$11.2M in Water and Sewer Bond funds already allocated by the City will be utilized. \$6.7M is requested from the City of Atlanta, which represents the CIP funding shortfall for this McDaniel Glenn. The McDaniel Glenn HOPE VI revitalization program has served as a catalyst for community and economic development, generating approximately \$64M in area investment including the revitalization of Rosa Burney Park, Dunbar Recreational Center and Dunbar Early Learning Resource Center. When completed, the estimated total area economic impact of this initiative will be over \$209M.

Description: AHA procured Grady Redevelopment LLC, which is a joint venture partnership between Integral Properties and Urban Realty, to develop Auburn Pointe on the site of the former Grady Homes as a dynamic mixed-use, mixed-income multi-generational community. Promoting a healthy and sustainable community, the master plan includes greenspace, community gardens and the revitalization of Butler Park which is adjacent to the Auburn Pointe, developed in partnership with the City of Atlanta. Upon completion, the revitalized community will replace 495 functionally obsolete and severely distressed public housing units with mixed-income housing consisting of 324 elderly-only rental units, 304 multifamily rental units, 48 on site for-sale homes and 21 off-site affordable for-sale homes in the surrounding community in partnership with Habitat for Humanity. To date, 478 rental units and 21 off-site affordable homes have been completed. Construction on 150 multi-family rental units is well underway; with the first units expected to be delivered in December 2013. The remaining on-site for homes will be developed as market conditions warrant. The revitalization of Grady Homes was made possible by \$24M in HOPE VI demolition and revitalization grant funds from the U.S. Department of Housing and Urban Development. These funds were leveraged by AHA and its private sector development partner to secure \$43.6M in private debt, Low Income Housing Tax Credit equity and other development funds. AHA provided an additional \$32.9M in funding for site remediation and strategic acquisitions. The overall Public Improvements budget is \$11.8M with \$10.8M expended to date on the construction / paving of public streets, streetscaping, storm/sewer separation (consistent with the consent decree), water distribution and erosion control improvements in the public right-of-way. The City of Atlanta funded \$5.8M in Water and Sewer Bonds and \$330K in Quality of Life Bonds. A total of \$5.4M has been expended in City funds. AHA provided \$5.4M to support the installation of public improvements. Future public improvement project costs include \$1.0M for the public improvements work associated with the development of 48 on-site for-sale homes. This work is planned in the next 60 months. The CIP funding shortfall for Grady Homes is \$1.0M. The Grady Homes HOPE VI revitalization program has served as a catalyst for community and economic development generating approximately \$104 million in area investments, including the adjacent Pencil Factory Lofts, the proposed Russell development on Wm. Homes Borders Sr. Drive, area condominium developments along DeKalb Avenue and the revitalization of Butler Park. When completed, the estimated total area economic impact of this revitalization initiative will be over \$210 million.

Revitalization of University Homes

Project Number: AHA--3664

Project Type:	Housing	Phase:	Construction
Project Start Date:	January 2009	Estimated	
Project End Date:	December 2017	Project Cost:	\$10,800,000.00
District(s):	4	Funded:	\$2,000,000.00
NPU(s):	T	Shortfall:	\$8,800,000.00

Description: Integral Development LLC is carrying out the revitalization of University Homes to create a dynamic mixed-use, mixed-income multi-generational community known as Scholars Landing, working collaboratively with the Atlanta University Center schools (Clark Atlanta University, Spelman College, Morehouse College and Morehouse School of Medicine). This revitalization is part of a larger collaborative master planning effort to create a college town environment that will transform three neighborhoods that surround the Atlanta University Center schools and the former University Homes site. This planning effort is funded by \$250K from a 2010 U.S. Department of Housing and Urban Development Choice Neighborhoods Planning Grant and a \$177K match from AHA. The first phase (Veranda at Scholars Landing) to be developed, a 100-unit affordable senior rental development is nearing completion and has been issued a Certificate of Occupancy. The development was funded with \$13.4M in construction costs solely from private debt and Low Income Housing Tax Credit equity. AHA funded \$2.0M for public improvements and site remediation for the Veranda. A second phase (Oasis) to develop 60 affordable assisted living rental units is in the planning stage. This phase of development was awarded an allocation of Low Income Housing tax Credits in December 2012 and represents the first affordable assisted living development funded with Low Income Housing Tax Credits in the State of Georgia. While still in the planning phase, the projected Public Improvements budget for this phase is \$1.0M for the construction of public streets, streetscaping, water distribution and erosion control improvements in the public right-of-way related to the development of the second phase (senior affordable assisted living housing). An additional \$1M will go to fund site remediation. Phase III public improvement is projected to cost an estimated \$8.8M. This work is planned in the next 48 months. The CIP shortfall for University Homes is \$8.8M.

Project Start Date:	June 2007	Estimated	
Project End Date:	January 2014	Project Cost:	\$29,949,387.00
District(s):	1,12	Funded:	\$29,949,387.00
NPU(s):	X,Z	Shortfall:	\$0.00

Description: The City of Atlanta is presently implementing a program to upgrade its existing sanitary sewer system to eliminate sanitary sewer overflows. To accomplish this objective, the City is proposing a series of system improvements which includes this project. This project consist of the full replacement of the East Point Trunk sewer and two major tributary outfalls; South Camp Hapeville Outfall and the South River Outfall. The East Point Trunk replacement will consist of replacing the existing sewer with approx 11,240 ft of sewer ranging from 36in to 48in dia. The South Camp Hapeville sewer will be replaced with approx 940 ft of 18in pipe. The South River Outfall will be replaced with approximately 870 ft of 24in pipe.

Testing and Analysis of Large Water Meters

Project Number: 08.02.015

Project Type:	Infrastructure	Phase:	Bid and Award
Project Start Date:	April 2007	Estimated	
Project End Date:	December 2022	Project Cost:	\$6,666,465.00
District(s):	All	Funded:	\$6,666,465.00
NPU(s):	All	Shortfall:	\$0.00

Description: The Testing and Analysis of Large Meters project is a system-wide asset management program designed to test the efficiency, accuracy, and performance of existing large meters 3 inches in diameter and greater and in accordance with AWWA standards. The calibration of these meters ensures that the meters is capable of measuring water that is within engineering tolerance when used within the intended environmental conditions over some reasonable period of time. The testing and analysis of large water meters should be performed every other year. Work includes on-site surveys and testing land analysis of large water meters throughout the City of Atlanta Drinking Water Distribution System. The site surveys shall be documented in writing and documented in writing and submitted to the City, including documentation of pre-test remedial repairs and a recommendation of the testing method that will be required for that meter. The testing and analysis shall be performed where requested as the City deems appropriate for each identified service location. Testing shall be documented in writing, and an analysis of testing shall be performed and a results report submitted to the City, including recommendations for repairs and replacement of each meter tested. There are approximately 3,000 large meters in the distribution system, all of which may be assigned for testing and analysis during the period of the contract.

North Area Main Improvements

Project Number: 98.04.019

Project Type:	Infrastructure	Phase:	Final Design
Project Start Date:	December 2005	Estimated	
Project End Date:	May 2015	Project Cost:	\$54,553,796.00
District(s):	2,3	Funded:	\$54,553,796.00
NPU(s):	A,C,D,E,F,J,K,L,N	Shortfall:	\$0.00

Description: In order to maintain adequate hydraulic pressures and flow rates in the northern portion of the distribution system, a hydraulic modeling study performed in August, 1995 originally projected several new transmission mains would be required in the area by the year 2000. While water conservation measures and slower than anticipated growth have somewhat allowed the extension for the implementation of this project, there have been periods where water pressures were low and peak demands have drained storage tanks. These events resulted in the December 1997, and March 2003 Georgia EPD Consent Orders. The initial 1995 study recommended routes have been revised and augmented for several reasons: additional modeling was performed to specifically respond to the Consent Order issues; and excessive failures began occurring on Northside Drive, a major northern feeder route, and an opportunity arose to coordinate with GDOT on a major street improvement on Northside Drive. This led to beginning an engineering design for the new route. This transmission main will replace existing distribution piping that is both undersized and beyond its useful life. The proposed main consists of pipe diameters including 36-inch and 12-inch. This transmission main segment will be implemented in 2 sections with the total length running from Marietta St. on Northside Drive, north to the Northside pump station. Council District and NPU location not applicable. Construction occurs outside of city limits.

Raising Valve and Manhole Covers: Annual Contract

Project Number:

DWM--3586

Project Type:	Infrastructure	Phase:	Final Design
Project Start Date:	April 2007	Estimated	
Project End Date:	August 2020	Project Cost:	\$12,088,450.00
District(s):	All	Funded:	\$12,088,450.00
NPU(s):	All	Shortfall:	\$0.00

Description: Annual contract for system-wide repair and replacement of 6, 8, and 12 inch valves, raising of manhole and valve covers, and restoration needed to include asphalt replacement and pavement concrete of various sizes. The repair and replacement of 6, 8, and 12 inch valves will supplement the regular maintenance/repair schedule of the DWM Office of Linear Infrastructure Operations ability to repair/replace valves after internal resources/efforts have been exhausted and in emergency situations. This project also provides for the raising of valves and manhole covers in response to road projects being constructed by the City of Atlanta and outside agencies (e.g. Georgia DOT, Fulton County, DeKalb County, etc.). This project provides the means to coordinate these activities with ongoing construction, thereby protecting the City's assets, ensuring that the City's assets are available for operation at all times, improving roadway drivability and avoiding potential claims resulting from delays in construction.

Description: The RM Clayton WRC Compliance Upgrade project will provide important primary, secondary and tertiary treatment upgrades and additions to the RM Clayton Water Reclamation Center (WRC). These upgrades will be in addition to the ongoing remedial work being constructed to address the September 2009 flood damage.

This project will upgrade the primary clarifiers, primary sludge headhouse, blower building, mixed liquor suspended solids (MLSS) channel, effluent weir troughs, primary and secondary scum removal systems, centrifuge facility, Nancy Creek pump station odor control, filter backwash building, UV facility, tunnel utilities, electrical and instrumentation systems and the administration building west lab. The process equipment and facility additions include an additional UV unit, a new UV building enclosure, an additional centrifuge and a belt press dewatering unit. The project equipment replacements include primary clarifier collection mechanisms, drives, and sludge pumps.

District(s):	2	Funded:	\$16,000,000.00
NPU(s):	M	Shortfall:	\$0.00

Description: This project provides funding for modifications to DWM utilities which are required in order to accommodate the Atlanta Streetcar Project. The Atlanta Streetcar Project is a 2.9 mile system that runs at-grade, in an East-West loop from the Martin Luther King Jr. national historic site to Centennial Olympic Park traveling on multiple streets with mixed traffic. Siemens Industry, Inc. was awarded a \$17.2 million contract from Metropolitan Atlanta Rapid Transit Authority (MARTA), on behalf of the City of Atlanta and the Atlanta Downtown Improvement District, to provide Atlanta with four new streetcars. The first car is expected to be delivered in September 2012 with revenue service beginning in early 2013. These will be the first streetcars in Atlanta since 1949. According to the GA Transit Connector website, implementing this long-term regional transportation vision will provide core connectivity between existing heavy rail, planned light rail and the Belt Line with the last mile in the heart of Atlanta. Offering enhanced travel options and increased urban mobility, the COA streetcar will play an important role in economic development and job creation along its routes. The budget includes federal, municipal and private funds from sponsors identified above including specific allocations for relocation of DWM public utilities. The total project budget is \$87 million. Of the total, \$45 million has been allocated for the design-build work to be performed under this contract including an allowance of \$8 million for work related to relocation of COA DWM public utilities. DWM will work in conjunction with MARTA to insure that all water, sewer, and storm water lines along the proposed route are adequately addressed during the construction of the first phase of the Streetcar Project.

Description: The project consists of a proposed 15-mgd deep submersible pump station and 4.5 MG storage cavern to capture and store wet weather flows from DeKalb County. The proposed site is located at the City of Atlanta and DeKalb County boundary on the South Fork Peachtree Creek Relief sewer, near the intersection of Peachtree Creek and Briarcliff Road. Wet weather flows, primarily from DeKalb County, will be diverted to the storage facility anticipated to be approximately 200 feet below grade and 700 feet in length. The pump station shaft is approximately 40 - 50 feet in diameter. The storage and pumping system will significantly reduce the capacity demand on the existing Peachtree Trunk and Peachtree Trunk Relief, both of which experience significant surcharge and incidence of spills during wet weather events.

Short Term Work Program

Introduction

The Short Term Work Program (STWP), also known as the Comprehensive Development Plan's (CDP) Project List, is a key implementation tool of the Comprehensive Development Plan. It is a list of the major actions to be undertaken by the City of Atlanta to implement to meet the CDP's recommendations over the next 15 to 20 years.

In order to maintain Qualified Local Government (QLG) status under the Georgia Planning Act, the City of Atlanta must have an adopted Short Term Work Program (STWP) for implementation of the Comprehensive Plan. The City of Atlanta updates its STWP/CDP Project list annually and submits it to the Atlanta Regional Commission (ARC) and the Georgia Department of Community Affairs (DCA) for review and comment.

The STWP/CDP Project List includes a description of community and economic development initiatives, programs, major capital improvements, infrastructure expansions, regulatory measures, and land development regulations to be adopted or amended. The STWP/CDP Project List includes partially funded, as well as unfunded projects as well as programs. A project must be in STWP/CDP Project List before it can be moved to the Capital Improvements Element project list.

For each item listed in the STWP/CDP Project List, the project name, a description of each project, estimated project cost, potential funding sources (Impact Fee, Potential Private/Foundation, Local, Regional, Federal, or TBA), Council Districts, and Neighborhood Planning Units (NPU) are listed, as provided. Estimated project costs may not apply to certain projects and programs or have yet to be identified.

The STWP can be amended several ways: during the annual update process, by the adoption by City Council of a plan and the list of projects recommended by a plan, as a result of a Development of Regional Impact review or when a project is identified for impact fee funding. In addition, NPUs are asked to submit projects for their NPU annually during the STWP/CDP Project List update.

The sections in the Short Term Work Program and the corresponding Departments are:

- Economic Development
 - Atlanta BeltLine, Inc.
 - Atlanta Development Authority (Invest Atlanta)
 - Watershed Management
- Housing

14	Sanitary Sewer Repairs: Annual Contract	<p>This is a sewer repair and replacement contract with an undefined scope and fixed unit prices with open cut pipe replacement as the primary construction method. Trenchless technology methods will also be a part of the contract. This contract supports Sewer Operations.</p> <p>Estimated End Date: 10-Sept-2027</p>	Local	\$39,000		
15	Sewer Asset Management	<p>Under the Consent Decree the City of Atlanta has inspected every foot of sewer through the SSES program. All condition assessments have been loaded into the CMMS system for the purpose of establishing a true asset management program. This program is designed to keep the system in top operating condition throughout the life of the utility.</p> <p>Some of the assets inspected, were inspected up to ten years ago. A program must be developed to continue inspection and maintenance based on condition criticality that ensures rehabilitation and/or replacement of these assets as appropriate. this will assure that all system assets are addressed in a timely fashion. The average footage inspected and rehabilitated per year could reach 250,000 feet of pipe. It is estimated that half of this pipe will need rehabilitation at a cost of \$200 per foot. This is the basis for an asset management program that reinvests 25 million dollars a year to maintain assets in good operating condition throughout the life of the utility.</p> <p>Estimated End Date: 01-July-2049</p>	Local	\$491,762.76	All	All
16	Sewer Cleaning and Pipeline Assessment: Annual Contract	<p>Citywide program of closed circuit TV (CCTV) inspection of existing pipeline condition and heavy cleaning. Following the completion of the SSES Activities two categories of on-going inspection will be needed. The first category identifies sewers requiring immediate rehabilitation. This work will be accomplished by the Sewer Group 1-6 sewer rehabilitation work. This project accomplishes the second category of needed work and provides routine sewer maintenance including, cleaning, root treatment, replacement of clean-out covers and CCTV monitoring, including any necessary remedial action.</p> <p>Estimated End Date: 08-Sep-23</p>	Local	\$54,000	All	All

17	Sewer Group 3 Rehabilitation Projects	This project is to rehabilitate the sanitary sewers in Sewer Group 3 which have been identified under the Sewer System Evaluation System (SSES) as needing rehabilitation. Under this project small diameter sewers will be rehabilitated by cured-in-place pipe lining techniques, pipe bursting, horizontal directional drilling and conventional excavation. In addition to the rehabilitation of manholes, the work under this contract also includes pre-cleaning of manholes and sewers.	Local	\$80,763.20	All	All
18	Sewer Group 4 Rehabilitation Projects	This project is to rehabilitate the sanitary sewers in Sewer Group 4 that were identified under the Sewer System Evaluation Survey (SSES) as needing rehabilitation. The Sewer Group Rehabilitation projects will address the vast majority of defects in the smaller diameter sewers (i.e. 18-inches and less). Under this project, small diameter sewers will be rehabilitated using cured-in-place pipe lining techniques, pipe bursting, horizontal directional drilling and conventional excavation. Manholes will also be rehabilitated under this contract.	Local	\$92,844.75	2,6,7	B,E,N
19	Sewer Group [3R] South River Basin North Capacity Relief Projects	The South River Basin Capacity Relief project consists of replacing various trunk and outfall sewers physically located north of the South River. This includes the following trunks and outfalls; McDaniel Trunk 24-in and 30-in replaced with 5,800 LF of new 42-in sewer; Lower Tenth Ward Trunk existing 36-in replaced with 42-in and 2,900 LF of new 36-in relief sewer Lakewood Outfall upgrades including flow transfer negative slope correction.	Local	\$20,900	9	D
20	Sewer Group [3R] South River Basin South Capacity Relief Projects	Replacement of various trunk and outfall sewers within the South River Basin. These projects are located physically south of the South River. The primary project include the Jonesboro Trunk and Trunk Relief, and the Forest Park Outfall.	Local	\$915.83	1,12	X,Y,Z
21	Sewer Group [4R] - Sugar Creek Basin Trunk Replacement	The replacement of the Sugar Creek Trunk will be performed using large diameter pipebursting technology. Approximately 5,350LF of 24 to 30 inch diameter sewer will be replaced with new pipe ranging from 30 to 36 inches. Field observations have determined that a combination of static and pneumatic pipebursting technologies are suitable as the replacement methodology. Estimated End Date: 04-March-2022	Local	\$12,554

22	Sewer Group [4R] -East Lake Trunk & Outfall System Capacity Relief Projects (Sugar Creek Basin)	This project consists of replacement of the East Lake Outfall (East), East Lake Outfall (West), and the East Lake Trunk, all within the City of Atlanta jurisdictional boundary. Approximately 10,915 LF of sewer ranging from 12- to 30-inches in diameter is proposed for upsizing. The proposed method will largely be pipebursting.	Local	\$13,006		
23	Sewer Group [5R] - Buckhead Trunk Replacement (Peachtree Creek Basin)	Replacement of the Buckhead Trunk consisting of approx 3,900 LF of 21-inch sewer with 30-inch sewer. Estimated End Date: 14-Aug-2023	Local	\$14,351.33		
24	Sewer Group [5R] - Peachtree Trunk stabilization (Peachtree Creek Basin)	The 96-inch Peachtree Trunk requires major repair to ensure its structural integrity is retained under varying conveyance conditions. This project is a phased continuation of the on-going project occurring under an emergency repair project. At completion, 8900 LF of the large diameter trunk will be cleaned and structurally sound. This project involves the use of specialized cleaning techniques to removed large accumulations of debris. Upon completion of the cleaning process, a sprial wound structural liner will be installed. This phase of the trunk stabilization will address approximately 5700 LF.	Local	\$58,190.15	6	E,F

30	South Area Plant Consolidation	The EPA and EPD are looking seriously at new nutrient removal permit requirements that will require plant upgrades. South River is in need of equipment upgrades and replacement due to the age of the facility and to reliably meet new permit limits. Intrenchment Creek needs a complete updating of equipment if it is to continue operating. This has been deferred because of the possibility of plant consolidation and the expenses incurred under the Consent Decree projects. All flows from these two facilities currently are transported to an outfall that is by Utoy Creek. Flint River Pump station should be designed and built for transport and treatment as a designed facility. Serious consideration should be given to consolidate these facilities into the Utoy facility. The Utoy plant is the newest and best operating facility the City operates. Consolidation will avoid expensive updates needed at South River to meet compliance and avoid costs associated with updating the Intrenchment Creek facility. The Utoy facility should be expanded and evaluated for meeting upcoming nutrient removal permit requirements. This project will reduce operating costs by approximately 15 million per year and eliminate the need for reinvestment capital in two aging facilities.	Local	\$12,373.93	1,10	H,Z

It is currently estimated that an average of 10 million a year will allow for the effective management of the plant infrastructure. Plant projects often exceed this annual value and it is anticipated that larger projects are accomplished from this financial project model. Current critical compliance projects in this category are RM Clayton Compliance, RM Clayton Solids Handling, Utoy Incineration and the South Plant Consolidation projects. These projects are critical to the City of Atlanta's ability to maintain compliance with the tighter operating permits. 1	Adamsville Pump Station 4th Pump	In order to maintain adequate hydraulic pressures and flow rates in the southwestern portion of the distribution system, a hydraulic modeling study performed in August, 1995 originally projected that additional pump capacity would be required at the Adamsville Pump Station by the year 2011. The existing re-pump station is equipped with three pumps of 45 MGD installed capacity and by the early 2000's peak demands required occasions where all 3 pumps were operating. Recent water conservation measures and slower than anticipated growth has actually reduced the amount of time that all 3 pumps operate, however if this occurs when one pump is out of service then system pressures become compromised. A fourth pump of 15 MGD is proposed in order to increase the firm capacity of the station and meet current peak and future demand increases. The building is also required to be extended in order to add the fourth pump.	Local	\$10,642		
2	Adamsville Transmission Main Improvements	Water Transmission Main approximately 21,625 liner feet of 48 inches transmission main, Cross connecting tie-ins to existing 42 inches concrete Transmission Main, Replacement of Venturi meter at Northside & Adamsville Pumping Stations. 3	Bellwood Quarry Reservoir	Bellwood Quarry Reservoir is a former surface mining quarry that the City of Atlanta is converting to a 2.4 billion gallon raw water storage reservoir for the drinking water system. The reservoir's water surface will cover approximately 40 acres. Preliminary studies and projected site development have identified that the City cannot adequately construct a secure perimeter service road around the quarry rim without obtaining easements from the adjacent property owner which in this case is the Georgia Power Company. The required easement dimensions are currently being developed.	Local	\$46,068.39	9	G
4	COA Utilities - GDOT & Municipal Projects	Conditions exist where GDOT and other municipalities are improving their roadways, bridges, or easements in which the City has its water and/or sewer utilities. 6	Distribution System Cathodic Protection Restoration	<p>The City of Atlanta has at least 32 miles of steel water mains within the treatment plants and the drinking water distribution system. The cathodic protection system for virtually all of this installed pipe has gone un-monitored for at least a decade. An effort to document all the steel pipe installations, perform field tests to determine the status of the protection systems, and design an adequate system to restore the cathodic protection is critical to protect these valuable assets. While steel pipe is of greatest concern, other metal structures subject to corrosion that is inadequately protected shall be identified.</p> <p>Cathodic Protection is an industry proven method of minimizing corrosive deterioration of steel water mains. This project will provide the restoration services required to renew critical drinking water pipeline cathodic protection systems on drinking water steel pipe. Short Term Work Program – NPU Projects

NPU Projects – Neighborhood Planning Units were asked to submit priority projects for inclusion in the STWP. The projects submitted by NPUs were forwarded to City Departments for review and comment. The NPU projects are listed separately from the Departmental STWP projects. However, many of the projects have been included in the STWP by City Departments or are listed in approved plans and are therefore included in the STWP.

A total of 423 projects are listed in the NPU Projects section of the STWP. The NPU Projects are grouped by the same categories as the STWP (see below). NPU Project Categories:

- Economic Development
- Housing
- Natural and Cultural Resources
- Community Facilities
- Transportation System
- Land Use

DWM	Land Support Services	The Bureau of Engineering Services (BES), Department of Watershed Management shall on some projects need to engage the services of a consultant experienced in Right-of-Way (ROW)/real estate services for the acquisition of permanent easements, temporary easements, fee simple properties, limited services for the exchange of easements, and/or other real estate services to be determined. The Land Support Services project is intended to support the smaller projects that are designed in-house and without the use of outside design services. The projects may arise from Operations, Sewer Rehabilitation Design, Emergencies or various similar internal sources. These projects typically involve sewer realignments, which may be subject to the First Amended Consent Decree (FACD) requirements and are time sensitive. In addition, the BES, in an effort to expedite access for sewer rehabilitation work and to populate the Department's database of permanent easement documents, requires additional easement research assistance from qualified easement/title researchers.	04/30/2013	\$298,428	All	All
