Subject: Teledyne ISCO Replacement Flow Meters, Communication Modules Purchases FY13 for the Office of Watershed Protection

Date: October 4, 2012

The Office of Watershed Protection is in need of assistance in procuring replacement sanitary sewer flow metering equipment, communication modules and rain monitoring equipment from Teledyne ISCO. This will be a onetime, sole-source purchase for the fiscal year 2013. On an annual basis, samplers, flow meters, rain gauges and associated proprietary Teledyne ISCO equipment will need to be replaced as some equipment has reached its field life expectancy. The need has arisen for additional monitoring for post rehab performance, Inflow & Infiltration and replacement of existing equipment that has exceeded the life expectancy.

In our opinion, the scope and budget remain appropriate for the aforementioned purchases and it is recommended that it be submitted to the Department of Procurement for authorization by the Mayor and City Council.

It is recommended that the resolution authorizing the purchase include language that the total purchase is authorized in an amount for the Office of Watershed Protection not to exceed **\$240,395.90** which includes all shipping and handling charges. Funding for Remote Monitoring Division shall be from:

RE: Sole Source Letter for Collection system flow meters 2150, 2110, 2103G communications module and associated equipment.

Please be advised;

This letter is to make you aware that Teledyne Isco located in Lincoln NE, is the sole provider for the Isco 2150 and 2103G flow system. No other manufacturer makes this model of flow logger.

Teledyne Isco Inc. is also the sole provider for automatic samplers and open channel flow meters like the 4200 series flow meters that are used by the Industrial Pretreatment group to monitor above ground at industries and have the ability to control samplers and use a paper plotter to report flow and sample events. They are not submersible and could not be used in a sewer environment.

The model 2150 series flow loggers are not the same type of flow meter and are made for a much harsher environment than the other open channel meters that are usually ordered by the environmental compliance group at the city of Atlanta.

The 2150, 2110 and 2103G are designed to be installed in a manhole in the sewer system, are submersible and have to be programmed using a lap top computer. They communicate with the server directly by push data communications and are logging devices used in I & I, SSES and collection system monitoring.

If there is more clarification that is needed I will be happy to assist you by answering any questions you may have about the type of equipment and it's intended use and applications where it is used. Kazmier and Associates is our sole authorized representative for the state of GA. You may place any order with them or direct with Teledyne Isco Inc.

Sincerely,

Chuck Abbott

SOLE SOURCE PROCUREMENT CERTIFICATION SS # 6449 -AT, TELEDYNE ISCO.

This sole source request is for the Teledyne ISCO Flow Meter, Sampler and Rain Gauge Service and Repair of Equipment for the City of Atlanta's Department of Watershed Management.

Having conducted an investigation of the available sources regarding the materials, goods and/or services stipulated herein pursuant to § 2-1191 of the City of Atlanta Code of Ordinances, Sole Source Procurement, my findings are the following:

- 1) By their written statement, Teledyne Technologies Company Inc. is the only manufacturer and service provider for the 2150 and 2103G Flow system.
- 2) By communication with Chuck Abbott, Senior Territory Manager, it has been confirmed that Teledyne Technologies Company Inc. is the sole provider of this product and its service.
- 3) The Flow systems are designed to be installed in a manhole in the sewer system and are submersible and have to be programmed using a lap top computer. They communicate with the server directly by push data communications and are logging devices used in I & I, SSES and collection system monitoring.

I, Adam L. Smith, by the authority vested in me pursuant to § 2-1191 of the City of Atlanta Code of Ordinances, do hereby approve, direct and authorize the sole source procurement for Requisition Numbers: 21225421, 21225411, 21225408, 21225400, 21225396, 21225390 and 21225380 for a combined total of \$240,395.90.

Teledyne ISCO, 2150 and 2103G Flow System Equipment
