**Re:** Sole Source Agreement Request for Innovyze, Inc. for the purpose of InfoWorks ICM  
Software Upgrade, Training, and Annual Maintenance

The Department of Watershed Management's Hydraulic Modeling Group under Offices of Engineering Services currently uses a total of 5 sewer modeling software licenses (2 licenses of InfoWorks CS/2D and 3 licenses of InfoWorks CS). The vendor for this software is Innovyze –the sole source provider. This software is currently utilized in performing hydraulic simulations of City of Atlanta's sanitary & combined sewer systems. This work provides support to engineering, operations, law, GIS, permitting, capacity certification groups of City of Atlanta. For certain projects (especially for combined sewer systems), the current software takes a lot of simulation run time (up to 8 hours). This causes delay in producing results and holds up the work. The problem can be solved by upgrading the current InfoWorks CS licenses to InfoWorks ICM. The new software will not only reduce the simulation run time (from 8 hours to 2 hours) but also enhance our existing modeling tools. Based on above, we recommend that City of Atlanta move to upgrade all existing software licenses of InfoWorks CS to InfoWork ICM.
