Requesting Dept.: Watershed Management

B. To be completed by the department:

1. Please provide a summary of the purpose of this legislation (Justification Statement).

The purpose of this legislation is to authorize Amendment No. 1 for FC-5318, South River Basin North Replacement Sewer in the amount of \$1,535,195.19.

The City of Atlanta is presently implementing a program to upgrade its existing sanitary and sewer system to eliminate sanitary sewer overflows. To this objective, the City has proposed a series of system improvements which includes this project. The South River Basin Capacity Relief Project consists of replacing various trunk and outfall sewers physically located North of the South River. This includes the following trunks and outfalls: McDaniel Trunk 24-inch and 30-inch replaced with 5,800 linear feet of new 43-inch sewer, Lower Tenth Ward Trunk existing 36-inch replaced with 42-inch and 2,900 linear feet of new 36-inch relief sewer, and the Lakewood Outfall upgrades including flow transfer negative slope correction.

2. Please provide background information regarding this legislation.

Unsuitable soils were encountered while excavating through the Lakewood Raceway, Claire Drive, and Pryor Road easements. Unlike other unsuitable soils encountered on the project thus far, these soils lack the consistency to be used to backfill the bore pit. The materials found in this soil ranges from household garbage to construction debris. The Report of Analyses of Potential Contaminated Soils yielded nearly 22,789.13 tons of contaminated soils. This Amendment No. 1, is requested to add additional funding to this project.

SUBJECT: FC- 5318 South River Basin North Replacement Sewer Project

RE: Request for Issuance of Change Order #1

DATE: May 8, 2013

In accordance with City Code, Section 2-1292, we are requesting a change order be issued for subject contract.

- Change Order Type: Legislative
- Contractor: Reeves Contracting Company
- Original Contract Amount: \$10,450,000
- Change Order Amount: \$1,535,195.19
- Construction NTP: April 9, 2012
- Final Completion Date: December 31, 2013

This change order is requested primarily for the following reason(s):

Excavation and Removal of Contaminated Soils at Claire Drive:

The City of Atlanta is presently implementing a program to upgrade its existing sanitary and sewer system to eliminate sanitary sewer overflows. To this objective, the City has proposed a series of system improvements which includes this project. The South River Basin Capacity Relief Project consists of replacing various trunk and outfall sewers physically located North of the South River. This includes the following trunks and outfalls: McDaniel Trunk 24-inch and 30-inch replaced with 5,800 linear feet of new 43-inch sewer, Lower Tenth Ward Trunk existing 36-inch replaced with 42-inch and 2,900 linear feet of new 36-inch relief sewer, and the Lakewood Outfall upgrades including flow transfer negative slope correction.

Unsuitable soils were encountered while excavating through the Lakewood Raceway easement, Claire Drive, and the Pryor Road easement. Unlike the other unsuitable soils encountered on the project thus far, these soils lack the consistency to be used to backfill the bore pit. The materials found in this soil ranges from household garbage to construction debris. The Report of Analyses of Potential Contaminated Soils yielded nearly 22,789.13 tons of contaminated soils. Currently, there is not sufficient funding in line item #93 "Excavation and Removal of Contaminated Soil" to cover the cost of this expense. Consequently, this Change Order is being requested to add additional funding to this line item.

Should you have any questions or concerns regarding this request, please contact the Project Manager for this contract, Rhonda Crenshaw at (404)-546-3331 or at rhondacrenshaw@atlantaga.gov.
