

A person in a dark suit is seated at a desk, writing on a document with a white pen. The desk is cluttered with a calculator, a white coffee cup on a saucer, and various papers. The scene is dimly lit, with a window in the background showing a blurred view of greenery. The overall color palette is a deep blue, creating a professional and focused atmosphere.

# Fulton County Board of Health Update

September 13, 2022

Presented by **Dr. Lynn Paxton, MD, MPH** – District Health Director  
Fulton County Board of Health

# MONKEYPOX UPDATE

# Monkeypox Update

- **Case Counts:**

**World** - 56,392 (31,800)

**US** - 21,149 (15,433)

**Georgia** - 1,522 (1,190)

**Fulton County** - 697 (565)

- Fulton accounts for 46% of the State of Georgia's total case count
- Fulton County vaccines administered to date: Over 9k (over 50% of the State's vaccinations)
- Fulton County will be administering the Jynneos vaccine (2 doses 4 weeks apart) at the Neighborhood Union Health Clinic on Wednesdays through Friday from 9-3.

# FULTON COUNTY CASE TRENDS

## AS OF 9/8/2022

Fig. 1. Probable and Confirmed Cases of Monkeypox in Fulton County, GA

**Total cumulative cases in Fulton County: 679**

# FULTON COUNTY CASES BY RACE AND AGE

Racial Distribution of Monkeypox Cases in Fulton County

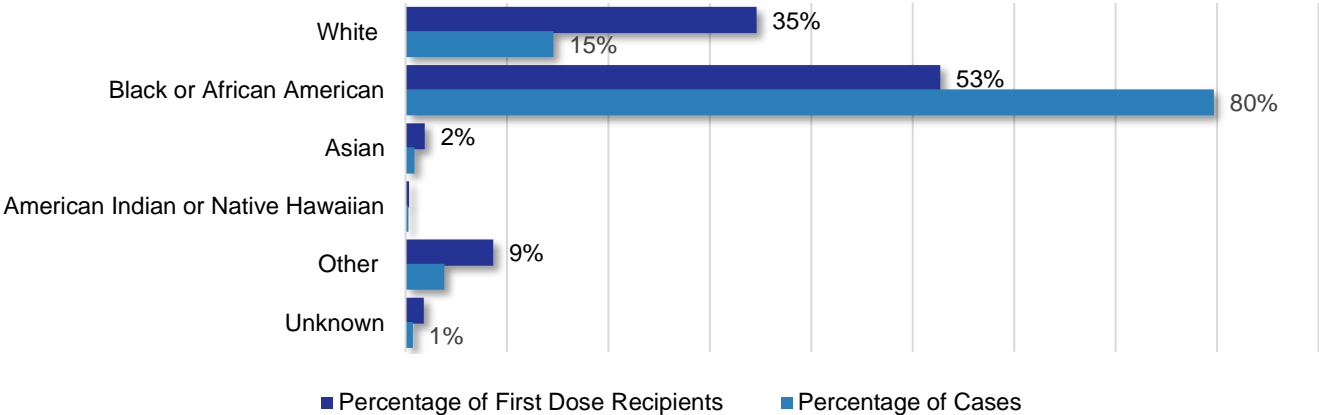

Age Distribution of Monkeypox Cases in Fulton County

# FULTON COUNTY VACCINATIONS BY RACE AND ETHNICITY

Distribution of Race in Monkeypox Cases and First Dose Recipients in Fulton County

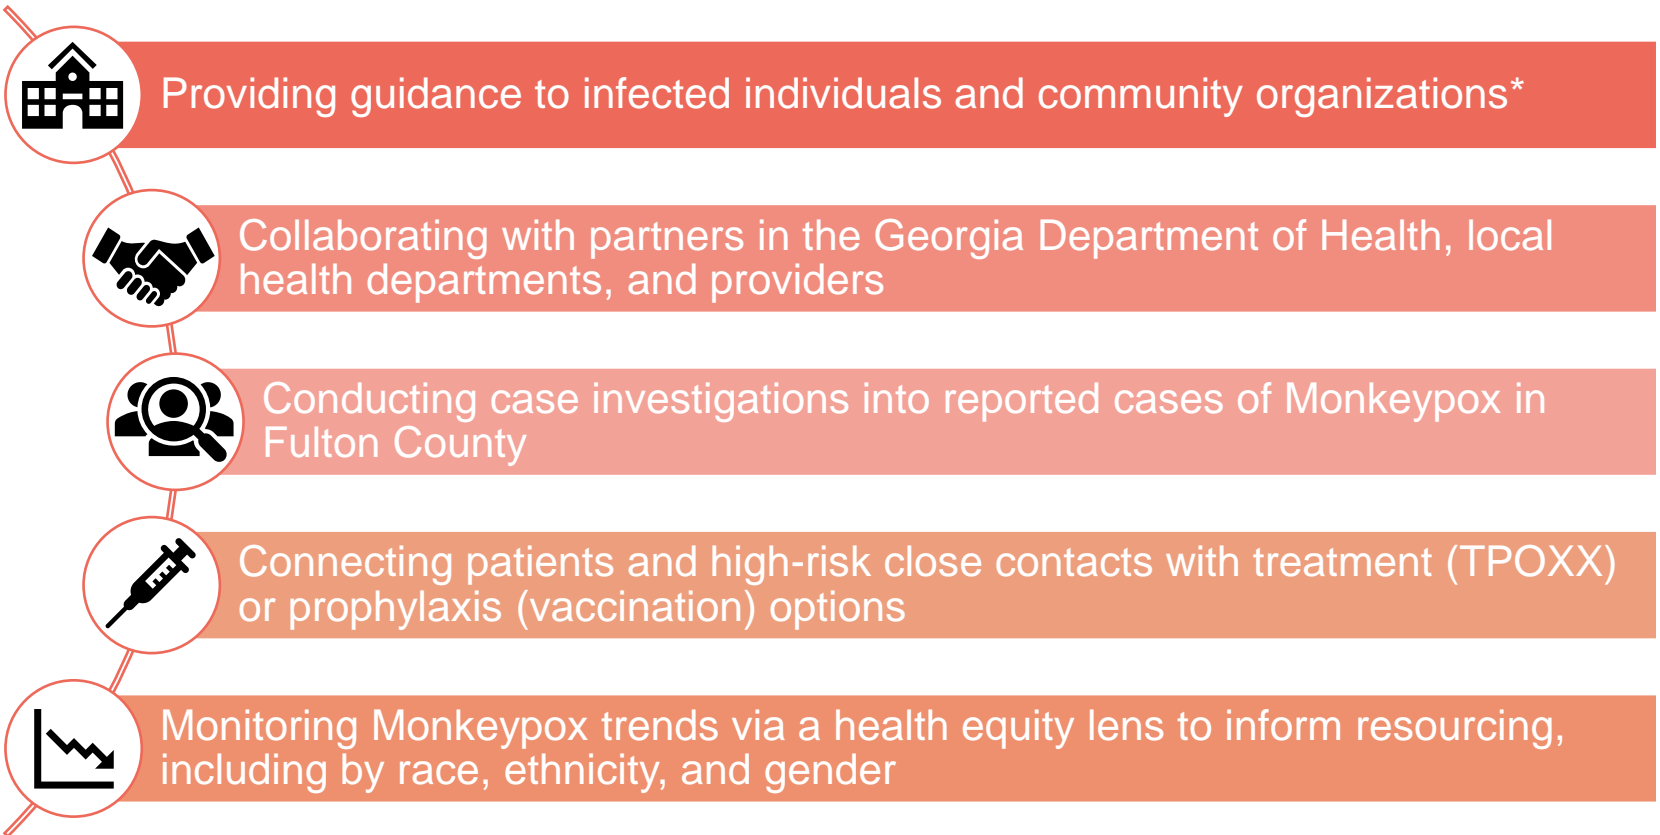

Race	% of First Dose Recipients
White	34.6%
Black or African American	52.7%
Asian	1.9%
American Indian or Alaskan Native	<1%
Other	8.6%
Unknown	1.8%

Ethnicity	% First Dose Recipients
Hispanic	6.7%
Non-Hispanic	90.7%
Unknown	2.6%

# MONKEYPOX RESPONSE

## BY FULTON COUNTY BOARD OF HEALTH

**\*Change to isolation guidance as of 8/16:** Patients may leave isolation prior to lesions healing if fever and respiratory symptoms have resolved. For more, visit: <https://dph.georgia.gov/epidemiology/acute-disease-epidemiology/monkeypox-guidance-and-resources>

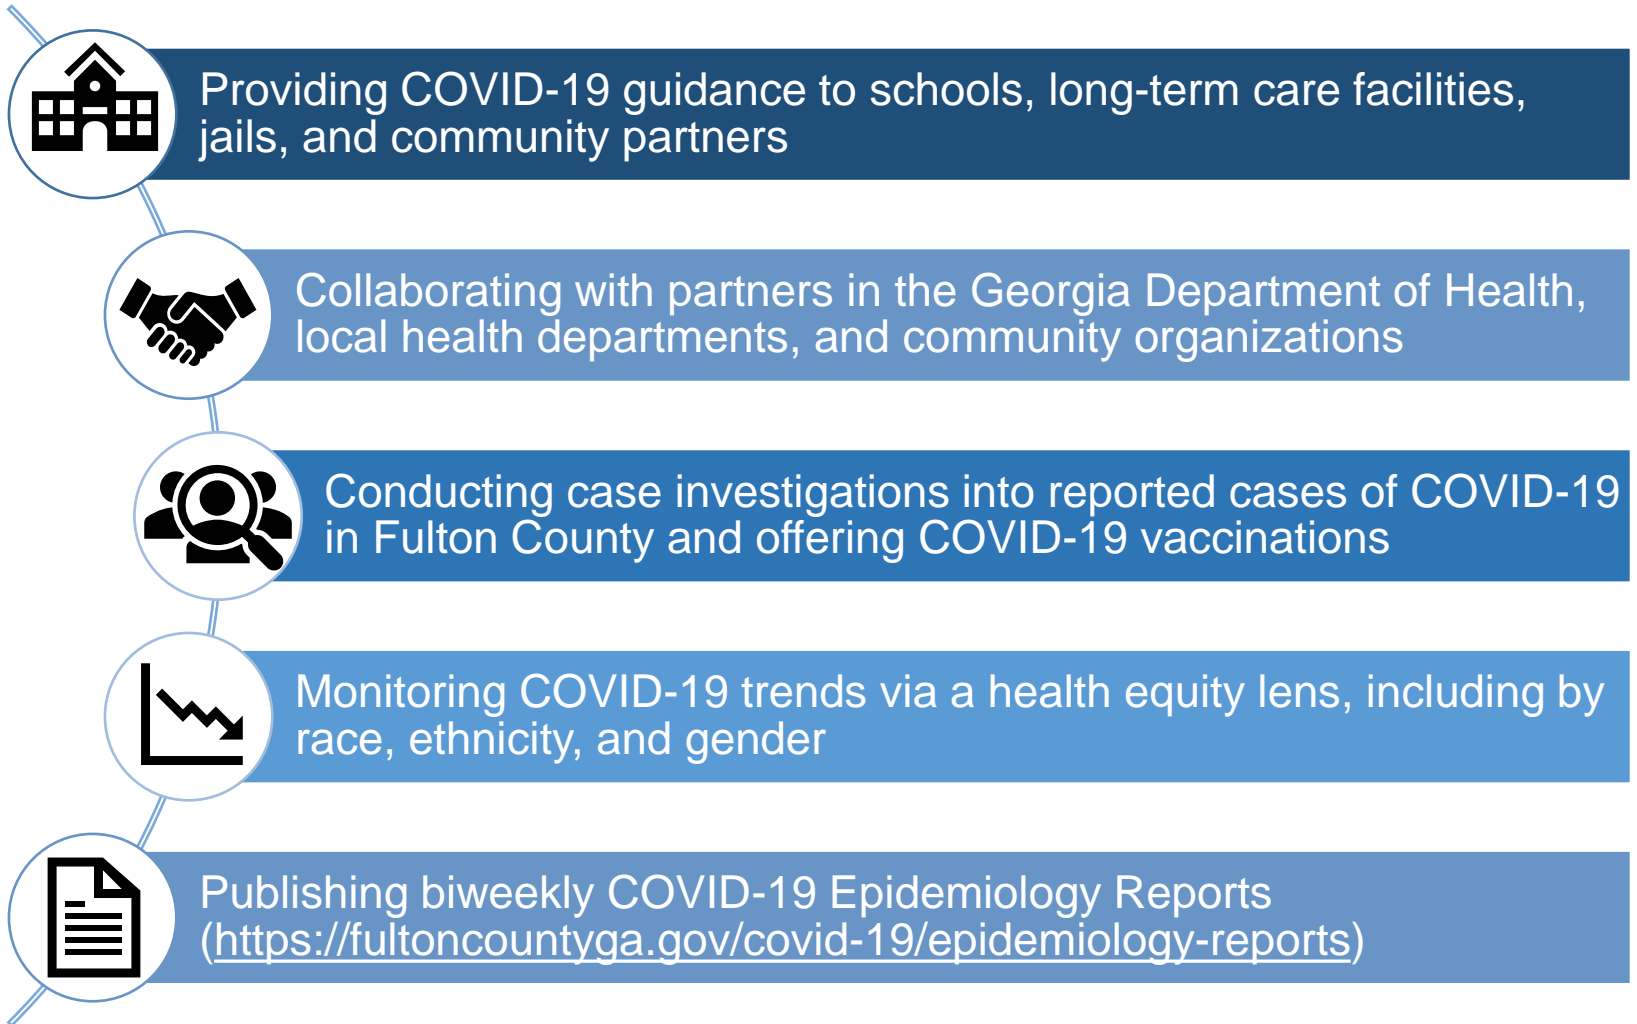

# COVID-19 UPDATE

# COVID-19 RESPONSE

## BY FULTON COUNTY BOARD OF HEALTH

# CUMULATIVE COUNT OF COVID-19 CASES, HOSPITALIZATIONS, AND DEATHS

USA

**94,796,424**

Deaths: **1,043,171**

FC

**258,233**

Hosp: **11,325**

Deaths: **2,235**

GA

**2,883,318**

Hosp: **124,973**

Deaths: **33,088**

Total confirmed cases and deaths includes PCR & Antigen positive tests

Hospitalizations includes the confirmed COVID-19 cases that were hospitalized at the time the case was reported to DPH or when the case was interviewed and is likely an underestimation of actual hospitalizations.

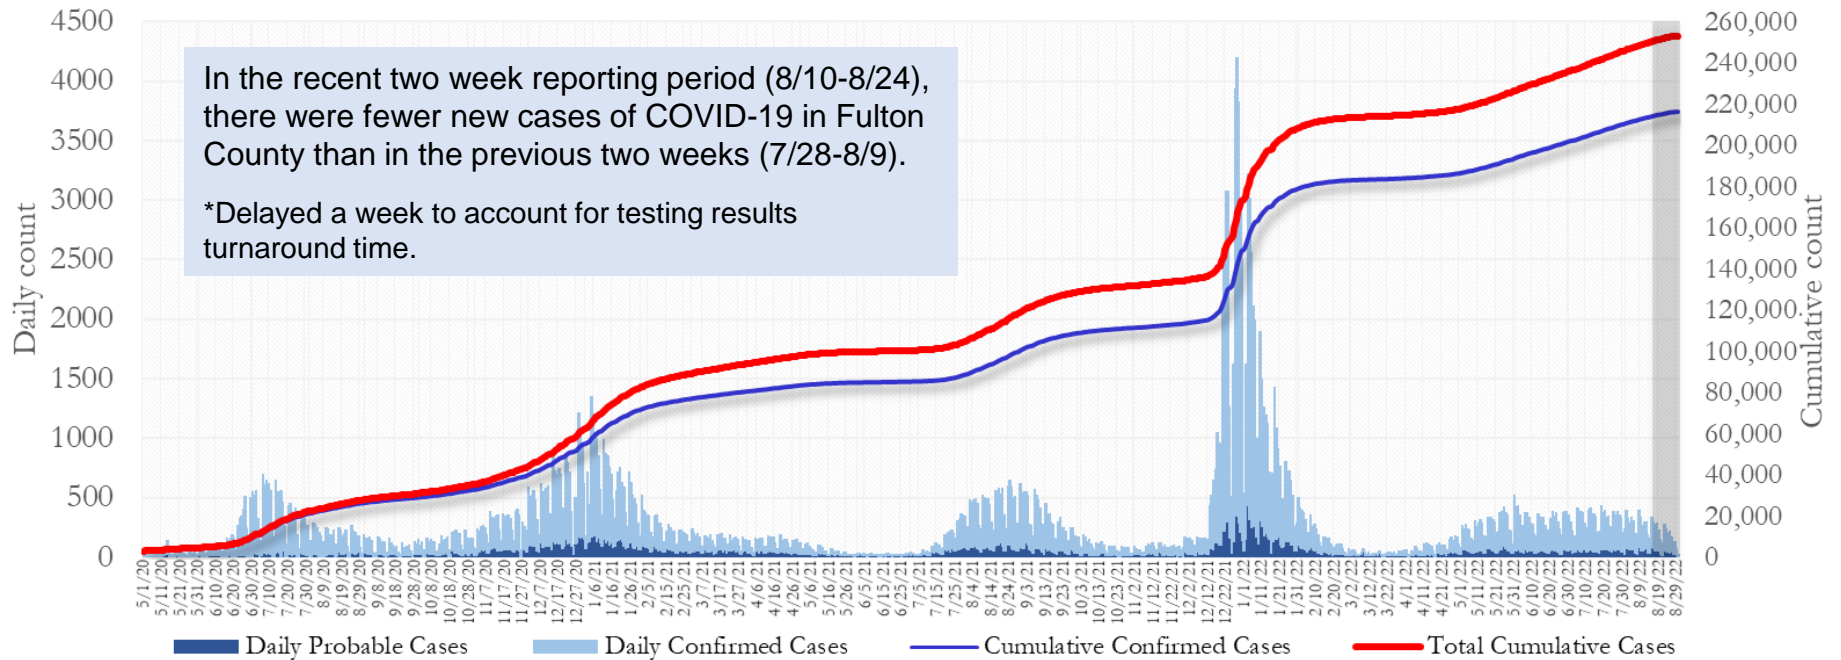

10/32

Source: Centers for Disease Control and Prevention. COVID Data Tracker. Atlanta, GA: US Department of Health and Human Services, CDC; 2022, September 8. <https://covid.cdc.gov/covid-data-tracker> and <https://dph.georgia.gov/covid-19-status-report>

**COVID-19 UPDATE**

# TRENDS IN COVID-19 CASES IN FULTON COUNTY

Fig 1. Daily and Cumulative Confirmed and Probable COVID-19 cases in Fulton County, GA

Counts shown reflect the number of cases as of 9:00 am on 8/31/22 using the date of first positive sample collection. Where date of sample collection was not available or missing, the date of report creation in GA [SendSS](#) was used instead. The Georgia Department of Public Health defines a confirmed cases as someone with a positive molecular test, also known as PCR. A probable case is defined as a positive antigen test, though probable cases are still considered positive cases and individuals who tested positive through an antigen test should follow all DPH isolation and quarantine guidance. **Note:** Delays in data reporting may cause changes in data counts, particularly in the shaded portion. Data throughout this report are preliminary and subject to ongoing data cleaning processes, and thus are subject to change.

# FULTON COUNTY CUMULATIVE CASES AND INCIDENCE RATE BY VACCINATION STATUS

Fig. 25. Fulton County Cumulative Case Counts of Covid-19 by Vaccination and Booster Status

COVID-19 cumulative case counts and incidence rates are higher among the unvaccinated.

Fig. 26. Fulton County Cumulative Incidence Rates of Covid-19 by Vaccination and Booster Status

# SEVERE OUTCOMES

## BY VACCINATION STATUS IN FULTON COUNTY

Confirmed COVID-19 Deaths by Vaccination Status

Confirmed Cases Hospitalized for Any Reason by Vaccination Status

■ Unvaccinated

■ Fully Vaccinated Without Booster

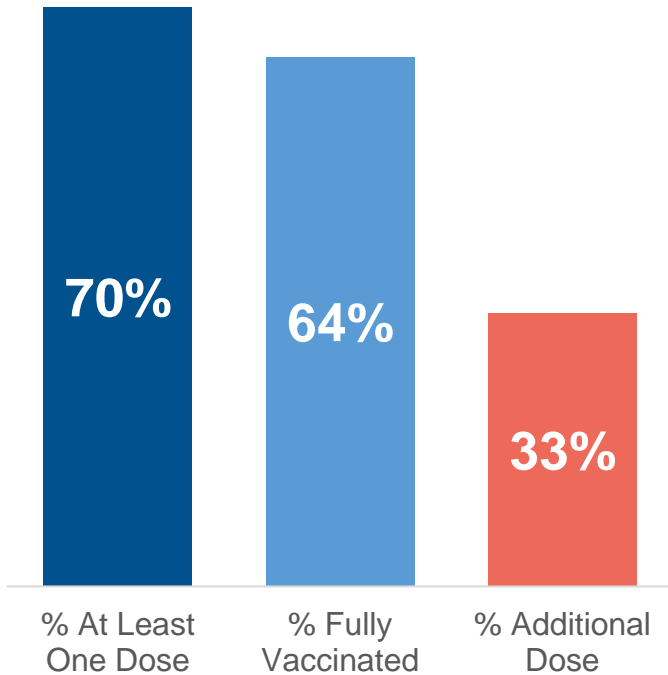

■ Fully Vaccinated With Booster

Of the 7% of deaths that occurred in vaccinated individuals, 91% were over the age of 60. Of that, 82% were over the age of 70.

*In accordance with DPH, data is displayed as confirmed cases hospitalized "for any reason" and tested positive for Covid-19. They were not necessarily hospitalized due to Covid-19.*

# VACCINES ADMINISTERED IN FULTON COUNTY

% of Residents Vaccinated

Distribution of Recipients with at Least One Dose by Sex

N = 1,786,643  
172,422 administered per 100k

# 9/8/22 Fulton County Risk Level

**103.95**

**Cases per 100K**  
(previously 129.42)

**10.4**

**COVID Hospital Admissions per 100K**

**6.0%**

**% of staffed inpatient beds occupied by COVID-19 patients**

## Recommended Response Actions for Current Risk Level

- Stay up to date on vaccinations (Get Boosted)
- Wear a face mask in all indoor public settings & crowded outdoor spaces.
- Avoid non-essential activities & crowded spaces
- Get tested if you have symptoms; exposed; traveled; interacted with non-household members.
- Stay home, especially if sick or exposed.

COVID-19 Community Levels - Use the Highest Level that Applies to Your Community

### Determining COVID-19 Community Levels

New Cases <sup>1</sup> (per 100,000 population in the last 7 days)	Indicator	Low	Medium	High
		<10.0	10.0-19.9	≥20.0
<200 cases	New COVID-19 admissions per 100,000 population (7-day total) <sup>2</sup>	<10.0	10.0-19.9	≥20.0
	Percent of staffed inpatient beds in use by COVID-19 patients (7-day average) <sup>3</sup>	<10.0%	10.0-14.9%	≥15.0%
≥200 cases	New COVID-19 admissions per 100,000 population (7-day total)	NA	<10.0	≥10.0
	Percent of staffed inpatient beds in use by COVID-19 patients (7-day average)	NA	<10.0%	≥10.0%

### CDC's CURRENT Risk Matrix

**(High)**

Based on a 7 day average

- >200 cases per 100K
- > 10 New COVID Hospital Admissions
- < 10 Percent of staffed Beds

The COVID-19 Community Level is determined by the higher of the new admissions and inpatient beds metrics, based on the current level of new cases per 100,000 population in the past 7 days.

\*The COVID-19 Community Level is based on the higher of the new admissions and inpatient beds metrics.

# CASE INVESTIGATION FOLLOW UP WORKFLOW

\*The case interview includes questions about patient information (including gender, race, and ethnicity), hospital admissions, clinical information, possible exposures, recent travel, smallpox vaccination history, and close contacts.

# U.S. VACCINATION STRATEGY

- 2 doses of JYNNEOS MPX vaccine given 28 days apart
- 4-tier JYNNEOS distribution strategy that prioritizes jurisdictions with the highest case rates
- Doses allocated to jurisdictions using PrEP-eligible and MSM living with HIV as proxy for high-risk groups
- Priority groups within jurisdictions:
  - Those for whom ACAM2000 (smallpox vaccine) is contraindicated
  - High-risk individuals (gay, bisexual, and other MSM)
  - Those with confirmed and presumed MPX exposures

# ONLINE VACCINATION APPOINTMENTS

English | Sign in

## COVID-19 or Monkeypox Vaccination Appointment

To schedule an appointment, please fill in the required questionnaire so that we can gather information regarding your readiness for COVID-19 or Monkeypox vaccination, and offer guidance and instruction to ensure your safety. You will need to provide the following details:

### Vaccine Eligibility

Qualifying questions to confirm vaccine eligibility

### Contact/Demographics information

Your Contact Details, Race, Ethnicity, Gender & Age

Monkeypox – Dose 1 or Dose 2 (JYNNEOS)

Continue

- As of August 15<sup>th</sup>, clients can make a 1<sup>st</sup> or 2<sup>nd</sup> dose MPX vaccination appointment anywhere in the state through GDPH’s website or by calling the Vaccine Scheduling Resource Line at (888) 457-0186.
- New intradermal approach allows up to 5 doses from a 1 dose vial.
- Vaccine supply remains limited; priority is individuals who may have been exposed to MPX.
- To schedule a MPX vaccine, visit [dph.ga.gov/monkeypox](https://dph.ga.gov/monkeypox) and click on the [Learn More](#) tab under “Find a Vaccine and Register for an Appointment.”
