Significant accounting estimates

Description of significant accounting estimates

Net Pension liability and related deferred inflows/outflows of resources.

Audit findings

Management's process used to develop the estimates

Management utilized the services of an independent actuary in order to estimate the amounts in accordance with GASB No.67 and 68.

Significant assumptions used that have a high degree of subjectivity

— The estimate is based upon key inputs including census data, discount rate, long-term rate of return and mortality tables.

Indicators of possible management bias

— There was no indicators of management bias.

Qualitative aspects

- There has not been a change from the prior period in the methods for making the accounting estimates
- The amounts in net pension liability and related deferred inflows/outflows of resources are material to the financial statements as a whole.
- The measurement date is June 30, 2019.

Conclusions

 KPMG utilized a reviewing actuary and tested the various inputs used to estimate the amounts under GASB No. 68 and determined management's judgements were reasonable.

Significant accounting estimates

Description of significant accounting estimates
